## May 2011

## Solar Panels Installed!

The installation of solar panels at U.S. Display Group's Newark, NJ plant is another step in the continued effort to reduce U.S. Display Group's carbon footprint. The 266.11 KW solar panel system was installed in April 2011, allowing U.S. Display Group to be environmentally responsible by providing clean energy to the plant, as well as Solar Renewable Energy Certificates (SREC) to local utility companies. Roughly 30,000 SF of the plant's roof is covered with 1,157 Trina Solar 230 watt modules with Sunlink Racing panels that provide 25% of U.S. Display Group's electricity usage.

## Display of the Month

Sunny Delight

Pop-up Case  
Stacker

will hold 24 -  
12 pack cases

Qty produced:  
3,000

## New Team Member

Mitch Bradford will be joining the USDG team as the Design Manager. Mitch comes to us with over 18 years of structural design experience. Welcome to the team!

## Recent Events

Barry Smith and Peter Heil (pictured by USDG sponsored hole) took part in a Junior Achievement golf tournament hosted by Bimbo May 23rd.
